Set-up

Unpack all panels from the cases.
Do not discard the packing material. **1**

All panels are numbered left to right
on the back. Assembly starts from
bottom left panel marked 1B
(1 Bottom) and continues with
panel marked 2B (2 Bottom). **2**

To form a curved panel gently curl
the panel and connect the braces. **3**

Use page 2 as an angle guide as you
continue building the bottom layer. **4**

Add the first panel marked 1T (1 Top)
into position. Add the second panel,
2T (2 Top) by sliding the aluminum
link into the routed portion of panel
1T. Slide panel into position. **5**

Add the remaining top panels until
assembly is complete. **6**

Position light fixtures where indicated
on the panel by placing the lights into
the channel and lower down. **7**

To assemble the header, attach the
separate pieces together with the sliding
connectors top and bottom and tighten
the thumbscrews. The hinged connectors
on the sides of the header hook over the
panels as shown on page 2. **8**

To assemble the counter start with
the left panel working towards the
right until all counter panels have
been connected. **9**

Slide the base of the counter against
the backwall and place counter top
on top of the base of the counter. **10**

Using the example above, repack
your exhibit. NOTES: Always use
cardboard sheets between panels.
Always pack panels fabric to fabric
or back to back. **11**
