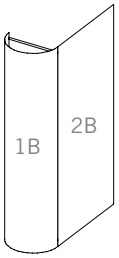
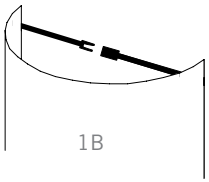
## Set-up

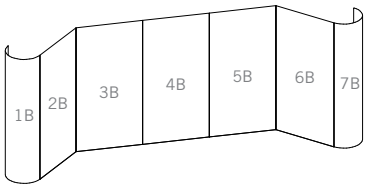
Unpack all panels from the cases. Do not discard the packing material. 1



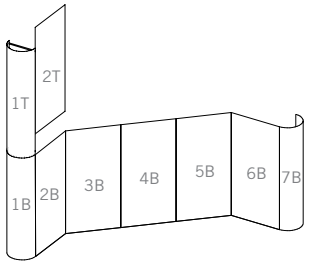
All panels are numbered left to right on the back. Assembly starts from bottom left panel marked 1B (1 Bottom) and continues with panel marked 2B (2 Bottom). 2



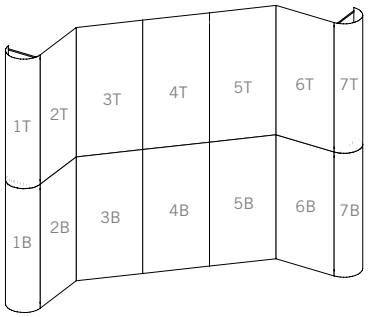
To form a curved panel gently curl the panel and connect the braces. 3



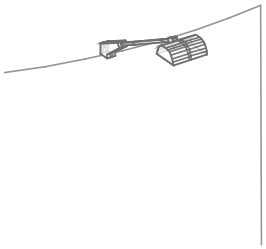
Use page 2 as an angle guide as you continue building the bottom layer. 4



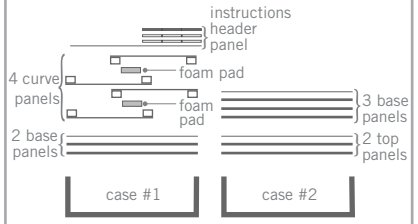
Add the first panel marked 1T (1 Top) into position. Add the second panel, 2T (2 Top) by sliding the aluminum link into the routed portion of panel 1T. Slide panel into position. 5



Add the remaining top panels until assembly is complete. 6



Position light fixtures where indicated on the page 2 7



Using the example above, repack your exhibit. NOTES: Always use cardboard sheets between panels. Always pack panels fabric to fabric or back to back. 8
