

The Banshee kinetic banner system is designed to be used indoors or outdoors in most weather conditions. The six unique shapes are designed to give you a variety of options to display your marketing message at Events, Trade Shows, Promotional Marketing and more. The Banshee uses the Pennant fabric process which is a Kaleidoscope Select process that uses full saturation so your message bleeds through and can be seen on both sides of the display. This system has two mechanisms to handle wind: a bearing polypropylene bushing allowing the graphic to rotate out of the wind; but equally important is that the top baton section bends at the same time as the whole unit swivels out of the wind and therefore handles gusts from any direction very well. Banshee is a simple, durable and effective banner system.

**Pennant fabric process -**  
This process is a one sided fabric with bleed through saturation. It is used with all Banshee systems and also can be used with hanging banner applications. The Pennant's full saturation feature gives your message 360° visibility.
